
Internet History

A one hour training module designed for Solicitors, Barristers and any other professionals who have to deal with computer-based evidence as part of their work. Forensic Investigators will often produce Internet history reports as part of their forensic examination. This module will help you to understand the relevance of the information contained within these reports along with Internet terminology and web browser artefacts.

Aim of the Course:

The aim of the course is to provide the candidate with an explanation of Internet terminology, web browser artefacts and the relevance of the information contained within Internet history reports produced by forensic investigators.

Course Level:

This course is an introductory level course. No previous experience of computer evidence is required.

Course Location:

For convenience the course is designed to be delivered on the customer's premises.

Course Date:

Please contact Orion Investigations to arrange a date for your course

Course Cost:

1000 Baht a person (excluding VAT). If two or more training modules are booked together price is reduced to 900 baht per person per training module.
